Table 1: Mean and standard deviation of 1999/2000 to 2019/2020 seasons overall mean ordinal ranking change in the specified league and point system. The tuple in the leftmost column represents the point system used to calculate the ranking changes. The **Win,Draw,Loss** section represents points for wins, draws, and losses in the form: home wins, home draws, home losses, away wins, away draws, away losses. The **Bonus** section represents the amount of additional points awarded or deducted based on the goal differential (GD) of a match. The **Bonus** points map to the following list: very high GD win, very high GD loss, high GD win, high GD loss (home/away agnostic). In this table, a very high GD was ≥ 5,and a high GD was $3 \leq \text{GD} < 5$.
