Table 4: Average number of teams that moved out of the bottom three during the 1999/2000 to 2019/2020 seasons for a given point system. The tuple in the leftmost column represents the point system used to calculate the ranking changes. The **Win,Draw,Loss** section represents points for wins, draws, and losses in the form: home wins, home draws, home losses, away wins, away draws, away losses. The **Bonus** section represents the amount of additional points awarded or deducted based on the goal differential (GD) of a match. The **Bonus** points map to the following list: very high GD win, very high GD loss, high GD win, high GD loss (home/away agnostic). In this table, a very high GD was  $\geq$  5, and a high GD was  $3 \leq$  GD < 5.

nıg	gn GD was ≥ 5,an	a a nigh GD	was $3 \le GD <$	5.
